About Me

Skilled in full-stack web development with a knack for seamless integration across front-end and back-end systems and intuitive problem-solving. Passionate about bringing new projects to life and translating business needs into scalable, end-to-end technical solutions. Eager to launch a career as an entry-level full-stack developer with a technology-driven firm.

PROJECTS

1. DOG API |

This project fetches and displays a list of dog breeds and their corresponding images using the Dog CEO API. It includes a dropdown for breeds and sub-breeds, and while images are being fetched.

Features :

1. Breed Dropdown
2. Image Viewer
3. Profile Dropdown

Tech-Stack :

1. Bootstrap V5.1.3
2. CSS3
3. HTML5
4. javascript

2. APPLE CLONE REPLICATES |

This project is a clone of Apple's website, a leading technology brand. The clone replicates key features of Apple's site, including product browsing, purchasing, user authentication, and support services. The aim of this project is to create a comprehensive e-commerce platform that delivers a seamless shopping experience for users.

Features :

1. All Apple products Available
2. Search for more topics
3. Sign in to My Support
4. Forgotten Apple ID password
5. Apple Repair
6. Billing and subscriptions
7. Find the accessories you're looking for.

Tech-Stack :

1. Bootstrap V5.1.3
2. CSS3
3. HTML5
4. Jquery
5. javascript

3. MOVIE PROJECT |

A full-stack movie project built with Node.js, Express, MongoDB, and EJS.

Features :

1. AUser Authentication (Signup/Login)
2. Admin Dashboard for Movie Management
3. Movie Listing and Details Page
4. File Upload using Multer
5. Cookie-based Authentication

Tech-Stack :

1. Bootstrap V5.1.3
2. CSS
3. javascript
4. HTML5
5. Node.js
6. Express.js
7. MongoDb
